OUR STORY

AUSTRALIAN MADE, FAMILY OWNED AND TRUSTED SINCE 1966

Wigley Engineering is Australian-owned and operated in Melbourne, Victoria. Since 1966 (across three generations) we have been designing and fabricating metal products at our state of the art facility in Dandenong South, primarily servicing the Mornington Peninsula, Melbourne Southeast suburbs and Gippsland regions.

From Laser Cutting and Brake Press Forming to Robot Welding and Thread Tapping, our expert team provides end to end services at competitive prices.

We now apply our nearly 6 decades of material cutting experience with a variety of different machines to create our products for customers all over Australia, some of the biggest names in the 4wd industry and our own tray and canopy products.

Wigley Engineering has invested in the best machinery available, and trained employees to the highest standard. Because of this we can be confident in saying that we can supply our customers with the highest quality products, at a highly competitive price, on time and in spec, every time.

With our 12kw ByStar Fibre Laser 4020, and CO2 Prima Platino 3015, there is not much we cannot cut. Our 12kw ByStar Fibre Laser with a 4x2mtr cutting bed is your solution to high volume, high repeatability, high quality cutting. If you need holes or shapes cut into SHS or RHS, our Prima Platino CO2 Laser is your machine.

Whether it be SHS or plate, mild steel, stainless or aluminium, quick turnaround or scheduled delivery, low volume or high volume, thin sheet to thick plate, Wigley Engineering has your laser cutting needs covered.

We have 2 Bystronic Xpert 150 press brakes, and 2 Durma Press brakes (120 tonne and 320 tonne) all with a maximum press length of 3000mm. The Bystronic Xpert press brakes are the perfect compliment to our ByStar Fibre Laser, and just like it, also provides state of the art pressing solutions.

With offline programming, class leading angle and back stop precision, we can prove if a job is possible before cutting, meaning no wastage,

and the ability to prove complex design before production, giving you a low cost, zero risk, top class product, first time, every time.

Our Durma press brakes are there for our heavier plate production, and we can press 12mm plate at 3000mm long with ease.

WELDING EXPERTISE, ACROSS GENERATIONS

We also have a team of skilled welders since day one at Wigley nearly 60 years ago. Our experienced skilled welders offer MIG, TIG and robotic welding services for a range of ferrous and non-ferrous materials. Using world-class Kemppi welding equipment, we can take on custom jobs of any scale.

Delivering superior strength and durability. Our welded solutions ensure robust results for applications where quality, safety and tolerance control are crucial.

In 2018, Peter decided to apply this exceptional Metal Fabrication experience to his passion for 4WD adventure. Creating custom one off builds for customers all over the country. Although the 4x4 division at Wigley was considered more a passion project at the time, it was certainly gaining attention in the industry.

In 2023 Wigley Engineering's 4x4 division was expanded further bringing in leaders in the industry to design, fabricate and market Wigley's products. Now, Wigley Engineering offers an exclusive range of aluminium ute Trays, Canopies and Accessories built tough for any terrain.

From tradies to tourers, Wigley Engineering can equip each customer's ute with a robust rear setup. Whether you need a custom metal component for your manufacturing business or a ready-made tray and canopy ahead of that next offroading trip, Wigley Engineering have the solution.

WARRANTY

**ENGINEERED TO LAST,
BACKED BY OUR
LIFETIME GUARANTEE**

We pride ourselves on quality and attention to detail. So our products can withstand YOUR demands. Our products are used by our team most weekends, and put through our demands.

Whether it's slamming into the side bank of Palm Creek in Cape York with the Wigs 79, Customers fully loaded with boats on the canopy roof on the Gibb River Road or our ambassadors sending their rigs on a quick weekender, You can be sure that our products are thoroughly tested and developed for whatever you will throw at them.

Each tray or canopy that comes out of our facility is BUILT TO LAST. We back this statement with a LIFETIME manufacturer warranty. We are 100% Australian owned and our trays, canopies and accessories are 100% Australian made and ISO 9001 certified.

All third party items are covered by their respective warranties.

TRAYS

BASE TRAY

The Base tray is simply all the features of the Standard tray with no headboard. With no headboard, it is perfect for those permanently mounted canopies and allows an extra 100mm to be gained in the canopy or tray space behind.

Key Features

- Zinc plated and powder coated steel chassis rails
- Aluminium construction
- Integrated WE tie down grid system
- Under tray tapered storage boxes
- Narva LED tail lights
- LED reverse flood lights
- Rear drawer storage
- Under tray water tank

STANDARD TRAY

The Standard tray is by far the most popular tray that is built here at Wigley. Including all the features you need to get out bush exploring the country or the ultimate companion on the work site. Most suited to a customer wanting a canopy setup.

Key Features

- Headboard with WE headboard mesh and spare wheel mounting
- Zinc plated and powder coated steel chassis rails
- Aluminium construction
- Integrated WE tie down grid system
- Under tray tapered storage boxes
- Narva LED tail lights
- LED reverse flood lights
- Rear drawer storage
- Under tray water tank

PREMIUM TRAY

The Premium tray is our top of the line tray package. Maintaining all the features of the Standard tray plus full length double skinned drop down sides.

Key Features

- Headboard with WE headboard mesh and spare wheel mounting
- Zinc plated and powder coated steel chassis rails
- Aluminium construction
- Integrated WE tie down grid system
- Under tray tapered storage boxes
- Narva LED tail lights
- LED reverse flood lights
- Rear drawer storage
- Under tray water tank
- Full length, double skinned drop down side

STANDARD TRAY INCLUSIONS

A Wigley tray comes with NO HIDDEN COSTS! Every accessory you need in your tray comes standard, plus those creature comfort accessories that can also be added.
